

Cable Gland Size Finder — M12 to M75, PG and NPT Threads by Cable Diameter, Material and Ex Rating

cBallast Technical Sourcing · generated 2026-09-29 · cballast.com/documents/cable-gland-size-finder-m12-m75-pg-npt-by-thread-cable-diameter-material-ex · first 500 rows; the full table is online

A cable gland is selected by entry thread (metric M12–M75 to IEC 62444, PG7–PG48, or ½"–2" NPT), the clamping range for the cable outer diameter, the material (polyamide for standard duty, nickel-plated brass or stainless steel for mechanical strength and EMC, with or without armour clamping), the ingress rating (IP66/IP68) and, in hazardous areas, the Ex e or Ex d certification. The finder lists the catalogue glands by thread size with the cable range quoted in the manufacturer designation.
