

Cylindrical Roller Bearing Finder — by Bore and Design (NU, NJ, NUP, N, NN / NNU double row) SKF

cBallast Technical Sourcing · generated 2026-09-29 · cballast.com/documents/cylindrical-roller-bearing-finder-by-bore-nu-nj-nup-n-nn-nnu-skf · first 68 rows; the full table is online

Cylindrical roller bearings carry high radial loads at high speed. The design letters state which ring carries the flanges and therefore how much axial location the bearing gives: NU (two flanges on the outer ring, inner ring free — non-locating), N (flanges on the inner ring), NJ (one inner-ring flange — locates the shaft in one direction), NUP (NJ plus a loose flange ring — locates in both directions), NN and NNU double-row types for machine-tool spindles. Bore follows the usual code (NU 2205 = series 22, bore 25 mm; NU 1020 = series 10, bore 100 mm). EC designs (ECP, ECJ, ECM, ECML) have larger rollers and higher ratings than the earlier design of the same size. The finder lists the catalogue by bore with one column per design letter.

Bore	NU	NJ	NUP	N	NN / NNU (double row)	NCF / other
bore up to 25 mm · 15 mm	NU202ECP, NU202ECP/C3, NU 202 ECP	NJ202ECP, NJ 202 ECP	—	—	—	RNU202ECP
