

DIN-Rail Power Supply Finder — 24 V DC by Output Current and Power (Siemens SITOP, Phoenix Contact QUINT/UNO, Schneider Modicon, Omron S8VK, Carlo Gavazzi)

cBallast Technical Sourcing · generated 2026-09-29 · cballast.com/documents/din-rail-power-supply-finder-24-v-dc-by-output-current-and-power-siemens-sitop-phoenix-quint-schneider-omron · first 199 rows; the full table is online

Control-panel power supplies are matched by output voltage (24 V DC is the industrial standard; 12 V and 48 V for special loads), rated output current or power, input (1 × 100–240 V AC, 3 × 400 V AC, or 24 V DC for redundancy), efficiency, and features such as power boost for tripping breakers, redundancy modules and NEC Class 2 limitation. The finder lists the catalogue 24 V supplies by current so an equivalent Siemens SITOP, Phoenix Contact QUINT/UNO/TRIO, Schneider Modicon ABL, Omron S8VK or Carlo Gavazzi SPD unit can be quoted.

Section	Output	Power	Input	Part number	Brand
12 V DC	12 V DC · 1 A	12 W	1 × 100–240 V AC	ABLM1A12010	Schneider Electric
