

Expansion Valve Finder — Danfoss TE 2 / TE 5 / TE 12 / TE 20 / TE 55, TGE, TUA / TUB / TUBE, T2 / TS2, AKV and ETS Colibri by Refrigerant, Connection and Type

cBallast Technical Sourcing · generated 2026-09-29 · cballast.com/documents/expansion-valve-finder-danfoss-te-2-te-5-te-12-tge-tua-tube-akv-ets-by-refrigerant-connection-and-capacity · first 500 rows; the full table is online

Thermostatic expansion valves are selected by refrigerant (the charge in the bulb is refrigerant-specific: R134a, R404A/R507, R407C, R410A, R22, R448A/R449A, R452A, R32, R744 CO₂), nominal capacity (kW at standard conditions), connection size and type (flare or solder ODF, inch or metric), equalisation (internal or external) and the mounting form. The Danfoss ranges are modular: T2/TE 2 (interchangeable orifices, 0.5–10 kW), TE 5, TE 12, TE 20 and TE 55 (separate power element, orifice assembly and valve body), TGE and TUA/TUB/TUBE (hermetic, factory-set), TS2 stainless, and electric expansion valves AKV (pulse-width) and ETS Colibri (stepper) for electronic controllers. The finder lists the catalogue by refrigerant with family and connection; orifices, power elements and valve bodies are listed by family so a replacement part can be quoted for an installed valve.
