

Flange Finder — EN 1092-1 PN6 to PN40 and ASME B16.5 Class 150/300 by DN, Pressure Rating and Type (Weld Neck, Slip-On, Blind, Plate)

cBallast Technical Sourcing · generated 2026-09-29 · cballast.com/documents/flange-finder-en-1092-1-pn6-pn40-asme-b16-5-class-150-300-by-dn-pressure-rating-type · first 243 rows; the full table is online

Flanges are matched by nominal size (DN / NPS), pressure rating (PN6, PN10, PN16, PN25, PN40 to EN 1092-1; Class 150, 300, 600 to ASME B16.5), type (type 01 plate/slip-on, type 05 blind, type 11 weld neck, type 02 loose with collar, threaded) and material (carbon steel P250GH/A105, stainless 1.4301/1.4404, A182 F304/F316). Bolt circle, bolt count and hole diameter are fixed by the standard for each DN/PN pair, so flanges of the same DN and PN from different makers mate. The finder lists the catalogue flanges by size and rating; see the linked dimension tables for bolt circles and thicknesses.

Section	DN / NPS	Rating	Type	Part number	Brand
