

Limit Switch and Position Switch Finder — by Actuator (Roller Plunger, Roller Lever, Rod Lever, Plunger, Spring Rod) and Contacts — Telemecanique XCK, Siemens 3SE5, Eaton LS, R. Stahl Ex

cBallast Technical Sourcing · generated 2026-09-29 · cballast.com/documents/limit-switch-and-position-switch-finder-by-actuator-and-contacts-telemecanique-xck-siemens-3se5-eaton-ls-r-stahl-ex · first 500 rows; the full table is online

Position switches are matched by actuator head (plunger, roller plunger, roller lever, adjustable-length lever, rod or wobble stick, spring rod, hinge), contact configuration (1 NO + 1 NC snap-action, 2 NC, 1 NO + 2 NC slow-action with positive opening), body (plastic or metal, standard 30 × 55 mm or compact) and connection (cable gland or M12 connector). Telemecanique XCK/XCM/ZCK modular bodies, Siemens SIRIUS 3SE5, Eaton LS-Titan and the Ex-rated R. Stahl 8074 series follow the EN 50047 (plastic, compact) and EN 50041 (metal) mounting dimensions, so a switch with the same actuator and contacts can be substituted. Safety switches with separate actuator (XCS, 3SE5312) and guard-locking types are listed in their own section.

Section	Actuator	Contacts	Body / feature	Part number	Brand
