

Low-Head, Countersunk and Button-Head Socket Screw Finder — DIN 7984, ISO 10642 / DIN 7991, ISO 7380, DIN 6912 by Size and Length

cBallast Technical Sourcing · generated 2026-09-29 · cballast.com/documents/low-head-countersunk-button-head-socket-screw-finder-din-7984-iso-10642-din-7991-iso-7380-din-6912 · first 400 rows; the full table is online

Where the full ISO 4762 head does not fit, four variants are used: DIN 7984 low-head cap screws (head height 0.7 d) for restricted spaces; DIN 6912 low-head screws with a pilot recess for key guidance; ISO 10642 / DIN 7991 countersunk socket screws (90° head) for flush surfaces; ISO 7380-1 button-head and ISO 7380-2 button-head with flange for guards, covers and panels where a rounded head is preferred. Head strength is lower than that of ISO 4762 — DIN 7984 and ISO 7380 are normally supplied in 8.8 or 10.9 rather than 12.9 — so they are not substitutes in highly loaded joints. The finder lists each standard by thread size and length with one column per material.

Thread × length	Steel 8.8	Steel 10.9	Steel 12.9	Stainless A2	Stainless A4	Other
