

LV Fuse Finder — NH000 / NH00 / NH0 / NH1 / NH2 / NH3, D01 / D02 Neozed, Cylindrical 10×38 / 14×51 / 22×58 by Rated Current and Class (gG, aM, aR)

cBallast Technical Sourcing · generated 2026-09-29 · cballast.com/documents/lv-fuse-finder-nh000-nh00-nh0-nh1-nh2-nh3-d01-d02-cylindrical-10x38-14x51-22x58-by-rated-current-gg-am · first 500 rows; the full table is online

Low-voltage fuse links are matched by physical size, rated current and utilisation class. NH blade fuses are graded by size (000, 00, 0, 1, 2, 3, 4) — the size fixes the fuse base and the maximum current (NH00 to 160 A, NH1 to 250 A, NH2 to 400 A, NH3 to 630 A); D01/D02 Neozed screw-in fuses (to 16 A and 63 A) and DII/DIII Diazed sizes suit distribution boards; cylindrical fuses 10×38, 14×51 and 22×58 mm fit modular fuse holders and carriers. Class gG (full-range, general purpose) protects cables and switchgear; aM (partial-range, motor) withstands starting current and needs separate overload protection; aR/gR (semiconductor) protect drives and rectifiers. The finder lists the catalogue by size and rated current with class and voltage.

Section	Rated current	Class	Voltage	Part number	Brand
NH size 000 blade fuse links	2 A	gG	500 V	2000013.2EL	Hellermann
