

Plain Bearing Finder — Spherical Plain Bearings GE..E / GE..ES, Composite Bushes PCM / PCMF and Sintered Bronze Bushes PSM / PBM by Bore (SKF)

cBallast Technical Sourcing · generated 2026-09-29 · cballast.com/documents/plain-bearing-finder-spherical-plain-ge-composite-bushes-pcm-sintered-bronze-psm-by-bore-skf · first 500 rows; the full table is online

Plain bearings carry load by sliding contact and are chosen by bore, outside diameter and length together with the sliding material. Spherical plain bearings GE..E (steel/steel, requiring lubrication) and GE..ES / GE..ES-2RS (steel/steel with lubrication grooves, sealed) accept misalignment and heavy alternating loads in cylinders, linkages and cranes; the number is the bore in millimetres (GE 100 ES = 100 mm). Composite bushes PCM (steel-backed PTFE, maintenance-free) and PCMF (flanged) and sintered bronze bushes PSM (oil-impregnated) are specified as bore × outside diameter × length (PCM 222525 E = 22 × 25 × 25 mm). The finder lists the catalogue by bore for each family.
