

Pneumatic Directional Valve Finder — 5/2, 5/3, 3/2 and 2/2 Valves by Port Size, Actuation and Voltage (Festo VUVG / VUVS / MFH / CPE, SMC, Norgren, Bürkert)

cBallast Technical Sourcing · generated 2026-09-29 · cballast.com/documents/pneumatic-directional-valve-finder-5-2-5-3-3-2-2-2-by-port-size-and-actuation-festo-vuvg-vuvs-mfh-cpe-smc-norgren-burkert · first 500 rows; the full table is online

Directional control valves are matched by function — 5/2 (double-acting cylinders, monostable with spring return or bistable with two solenoids), 5/3 (closed, exhausted or pressurised centre), 3/2 (single-acting cylinders and pilot signals, normally closed or open) and 2/2 (shut-off) — by port size (M5, M7, G 1/8, G 1/4, G 3/8, G 1/2 or push-in tube fittings), actuation (solenoid with 24 V DC or 230 V AC coil, pneumatic pilot, manual lever or pushbutton) and mounting (in-line, manifold, ISO 5599 or VDMA sub-base, NAMUR for actuators). Festo VUVG / VUVS (compact and standard in-line), MFH / JMFH (classic), CPE (compact) and VSVA (ISO), SMC SY / VF, Norgren V60 and Bürkert types all follow this scheme. The finder lists the catalogue by function and port size with actuation and coil voltage.
