

Panel Radiator Finder — Purmo Compact, Plan, Ventil Compact and KON Convector by Type, Height, Length and Heat Output

cBallast Technical Sourcing · generated 2026-09-29 · cballast.com/documents/purmo-radiator-finder-type-height-length-output-compact-plan-ventil-kon · first 500 rows; the full table is online

Panel radiators are specified by type (10, 11, 20, 21, 22, 33 — the digits give the number of panels and convector fins), height, length and heat output at the design temperatures (EN 442 at 75/65/20 °C; many Nordic listings quote 70/40/20 °C for low-temperature systems). Ventil (integrated valve) models have the valve insert built in for bottom connection; Compact models connect at the side. The finder lists the catalogue radiators by type and height so an equal-output replacement can be selected.

Section	Type	Height	Length	Output (as listed)	Part number
