

Roller Chain and Sprocket Finder — ISO 04B–32B and ANSI 25–200 by Chain Number, Strands and Teeth (SKF PHC / PHS)

cBallast Technical Sourcing · generated 2026-09-29 · cballast.com/documents/roller-chain-and-sprocket-finder-06b-to-32b-ansi-25-to-200-by-chain-number-strands-and-teeth-skf-phc-phs · first 500 rows; the full table is online

Roller chain drives are matched by chain number, which fixes the pitch (ISO / BS series 06B = 3/8 in, 08B = 1/2 in, 10B = 5/8 in, 12B = 3/4 in, 16B = 1 in, 20B = 1¼ in, 24B = 1½ in; ANSI series 40 = 1/2 in, 50 = 5/8 in, 60 = 3/4 in, 80 = 1 in, 100 = 1¼ in, 120 = 1½ in), the number of strands (simplex -1, duplex -2, triplex -3) and, for sprockets, the number of teeth and hub form (A = plate wheel, B = one-side hub, C = two-side hub, TB = taper-bush bore). SKF designations read PHS 12B-2TB76 (12B duplex sprocket, taper bush, 76 teeth) and PHC 08B-1X10FT (08B simplex chain, 10 ft box) or PHC 08B-1C/L (connecting link). The finder lists the catalogue by chain number so chain, links and sprockets of one pitch are found together.
