

Solenoid Valve Finder — Danfoss EV210B/EV220B/EV250B and Others by Port Size, Function (NC/NO), Media and Coil

cBallast Technical Sourcing · generated 2026-09-29 · cballast.com/documents/solenoid-valve-finder-danfoss-ev210-ev220-ev250-port-size-function-nc-no-coil · first 374 rows; the full table is online

Solenoid valves are selected by port thread (G/R ¼" to 2", or NPT), function — NC (normally closed, opens when energised) or NO — operating principle (direct-acting for zero differential pressure and small orifices; servo-operated needing a minimum differential of about 0.1–0.5 bar; assisted-lift for zero to high differential), seal material (NBR, EPDM, FKM, PTFE) against the medium and temperature, and the coil voltage. The finder lists the catalogue valves by port size and function; the coil is normally a separate part number.
