

V-Belt Pulley Finder — SPZ, SPA, SPB, SPC, Z/A/B/C, 3V/5V/8V by Number of Grooves and Pitch Diameter (Taper Bush and QD, SKF PHP)

cBallast Technical Sourcing · generated 2026-09-29 · cballast.com/documents/v-belt-pulley-finder-spz-spa-spb-spc-z-a-b-c-3v-5v-8v-by-grooves-and-pitch-diameter-taper-bush-skf-php · first 500 rows; the full table is online

A V-belt pulley is specified by belt section (SPZ, SPA, SPB, SPC wedge belts; Z, A, B, C, D classical belts; 3V, 5V, 8V narrow inch belts), number of grooves and pitch diameter, plus the mounting: taper bush (TB), QD bush (SDS, SK, SF, E) or a solid hub for machining. The SKF designation carries all of these — PHP 5SPZ250TB is a five-groove SPZ pulley of 250 mm pitch diameter for a taper bush. Pitch diameter and groove count set the speed ratio and the belt count; the bush size is fixed by the pulley. The finder lists the catalogue by belt section, grooves and pitch diameter so an equivalent pulley can be matched to an existing drive.

Section	Grooves	Pitch diameter	Bore / mounting	Section	Part number	Brand
