WHY INSTALL PROFESSIONAL DUCTS AND ACCESSORIES

The Optima duct series, **available in 5 sizes (35, 62, 75, 102, 135), is the most refined and functional one on the market today.**

The Optima TB model, equipped with a **four-way spirit level**, further emphasises the qualities of a product that was created with the common goal of the entire range: to offer **quick, simple and concrete solutions to installation problems, while at the same time giving a pleasant aesthetic result which harmonises with current design trends.**

The Optima Full Cover ducts have a completely enveloping cover that closes flush with the wall. A practical protective film is applied to the cover to be removed when the work is completed. The removable film is used to protect the duct during the installation phase. Once the operation is completed, it will be removed ensuring cleanliness of the duct itself.
