

KING TONY products comply with REACH legislation 1907/2006/EU and RoHS standards.

We also provided self-declaration statements to customers on our end if needed.

REACH regulations are updated annually with newly added restricted substances, and QC Dept reviews and verifies that our products continue to meet these requirements.

Regarding SVHC, the substances contained in KING TONY products are within the allowable limits.

Taking 433521MR as an example, the testing results meet the regulatory requirements.

Although trace elements are detected, all are within the permitted threshold values.
