

Greenpipe Snipp & Snapp® Quicklock

Greenpipe Snipp & Snapp® Quicklock is a priceworthy divisible cable protection pipe. It's made out of 100 % high quality recycled PP-EPDM plastic. Simple and fast installation without any tools needed will lead to low cost. An innovative design and well-developed locking system and hinges, secures the pipe halves and offers a safe and reliable protection.

The divisible pullresistant sleeve provides an ideal connection to ensure that the entire line remains fullyprotected even over long distances with every connection giving a large amplitude (up to 22.5°/meter) of cable flexibility.

- Quick and easy installation without tools.
- Good working environment for installers.
- Made of 100 % high quality recycled PP-EPDM plastic.
- Up to 80 % environmental savings compared to virgin material.
- Hooks and hinges prevent the halves from separating from each other.
- Mecanical properties tested according to ISO 9969:216 and EN 61386:24.
- Tillable up to 22.5° per meter in any direction enables flexible installation.
