

Cervarese S. Croce, 26th July 2024

To the kind attention of **AHLSSELL DANMARK A/S**
HAANDVAERKERVEJ 14 POST-BOX 16 4
DK 9100 AALBORG
DENMARK

Subject: REACH regulation **EC 1907/2006** and EU Waste Framework Directive **WFD 2008/98/EC**.

In the framework of the REACH regulation, a rubber hose is defined as an **article**. In addition, the latter does not have an intentional discharge of substances in normal or reasonably foreseeable working conditions.

The REACH regulation under article 33 states that the supplier of an article, containing a substance included in the **Candidate List** as one of the “**Substances of Very High Concern**” (SVHC - <http://echa.europa.eu/web/guest/candidate-list-table>), in concentration greater than **0,1% weight/weight**, must supply a sufficient amount of information to the receiver to allow a correct and **safe use of the article** including, at least, the name of the substance.

In addition, the **WFD 2008/98/EC under article 9.1.(i)** compels the supplier of an article subjected to the obligations described above, to **submit to ECHA** a certain amount of information about that article to the so-called **SCIP (Substances of Concern In Products)** database. This obligation applies from January, 5th, 2021. Once completed the notification, ECHA sends to the notifier the “ECHA Article ID”, known commonly as SCIP number, which must be communicated to the receiver of the article.

The hose **PUERTORICO 16 50%780510 90x107.5** (code: **1395190**), supplied by **IVG Colbachini S.p.A.** to **AHLSSELL DANMARK A/S**, contain the following substance listed in the **Candidate List**, as detailed below:

- **Alkanes, C14-17, chloro**: CAS: 85535-85-9, EC n° 287-477-0, with concentration between 0.8% and 0.9%. This substance was included in the Candidate List on 08/07/2021.

The associated **SCIP number** for the **PUERTORICO** hose is: **e943de5a-b668-4b0a-8a23-ba38a04844d8**.

IVG Colbachini S.p.A. specifies that such substances are incorporated into the polymeric matrix of the hose itself, therefore the risk of release in normal or reasonably foreseeable conditions is low.

The present communication is drafted with reference to the latest update of the **Candidate List published on 25/06/2025**.

We are at your disposal for any further clarification you may require.

Kind regards,

IVG Colbachini S.p.A.
Mauro Tonazzo
