

Faustine DANNEELS

Group Product Compliance Manager

April 22nd, 2024

Object: REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals) & SVHC – List of January 2024

Dear all,

As you may know, the ECHA (European Chemical Agency) added in January 2024 five substances in the candidate list of Substances of Very High Concern (SVHC) for Authorization. The list of SVHC substances now consists of 240 entries.

These new listed substances have some hazardous properties, and are mainly used in inks and toners, coating products, polymers, adhesives, and chemicals.

For all Lyreco Group suppliers, an up-to-date REACH analysis has been achieved. Each supplier has been asked to complete a REACH-SVHC declaration, to inform Lyreco about the SVHC status in their products, since the last list.

As a reminder, the EU OBLIGATIONS:

- ⇒ Art. 33 REACH: Immediately after the inclusion of a substance in the candidate list, suppliers of articles containing such a substance in a concentration higher than 0.1% (w/w) must provide sufficient information to enable the safe use of the article to the recipients of the article (as a minimum, the name of the substance must be provided). Consumers can request similar information. The supplier of the article is obliged to provide this information within 45 days, free of charge.
- ⇒ Waste Framework Directive: Suppliers of articles have to notify ECHA if the article contains SVHC in a concentration above 0.1%. This notification is published in ECHA's database of Substances of Concern In Products (SCIP).
- ⇒ Article 7 REACH: For articles with SVHC in concentration above 0.1%, and with the quantity > 1 ton per year, a notification shall be submitted to ECHA by the manufacturers or the importers. The notification of SVHC in article shall be made within 6 months after its inclusion to the list.

In addition of these statements, we complete as usual the process by making random checks by a third party. The tests are now finished, and SVHC have been detected in three of these products. The suppliers involved will try to find alternative solution to replace/change the affected parts. If no alternative solution can be found, then a notification to ECHA and to you will be done.

As a synthesis and based on suppliers' statement, to date, we have done a total of 253 notifications to ECHA for Group products which contain SVHC in concentration above 0.1%. This list includes 219 products for which Lyreco is distributor (EU suppliers with supplier brand), and 34 products for which Lyreco is considered as manufacturer (EU suppliers with Lyreco brand and/or imported products)
See the list in Annex I.

As a reminder, please note that this Memo may be subject to changes, as suppliers are studying the subject throughout the year.

To fulfill Lyreco's obligation of information to customers (Art. 33.1 REACH), please do not forget to translate in your official language(s) all the SVHC declarations I share with you, as done previously for the old ones. And then, please upload them on the Webshop.

Just let me know if you need any further information.

Best regards,

Annex I

The SCIP number(s) mentioned below will allow the customer to search on the ECHA database (<https://echa.europa.eu/scip-database>), and thus have all the necessary data concerning the affected product(s).
