PATENTED DESIGN IMPROVES SAFETY AND COMFORT

File Handle

ERGONOMIC HANDLES

Our file handles are ergonomically designed, following the Bahco ERGOTM Process, to reduce muscle tension and the risk of injury. The hard polypropylene core, covered with a thermoplastic elastomer, provides a comfortable non-slip grip, and the handle's smooth contours fit into the hand naturally.

As a safety feature, the handle covers the tang and shoulder completely. This prevents the hand from slipping off the handle onto the file blade.

Bahco supplies most popular files complete with a symmetric handle to allow the user to grip it comfortably regardless of which side of the file is used.
