**Request: Manufacturer Declaration – REACH and RoHS CRM:0896000003951**

Dear Sir or Madam,

E/D/E's product range is orientated towards the requirements of a modern market. In this environment, we closely monitor the requirements and developments that are placed on us and our partners and adjust our actions accordingly in a target-orientated manner. We would like to answer your enquiry as follows:

**REACH**

The E/D/E trades with chemical-technical own brands and with products that are articles in the sense of chemical law. These are mainly purchased from European suppliers and only in individual cases from non-European suppliers. E/D/E is therefore subject to the obligations to inform in accordance with Article 33 of the REACH Regulation if a product supplied by us contains a substance of very high concern in a mass concentration of more than 0.1 percent.

In our own interest and against the background of a high level of delivery and product safety, we take these obligations to inform very seriously. We therefore fulfil the legal requirements by means of the following procedure:

Our EU suppliers of articles are legally obliged to inform us without being asked if the products supplied contain an SVHC substance above 0.1 mass percent. If we receive such information from our suppliers, we immediately pass this information on to the downstream user in accordance with Article 33 of the REACH Regulation. In addition, we obtain written confirmation that the products supplied do not contain any SVHC substances > 0.1 mass percent. We endeavour to reach separate agreements with all non-EU suppliers of articles, as they are not automatically subject to the REACH information obligations, and to obtain assurances from them that no SVHC substances > 0.1 mass percent are contained in the products they supply.

From today's perspective and against the background of the information provided by our suppliers, it is not expected that our products supplied to you contain SVHC substances in a mass concentration of more than 0.1 mass percent. Should we be informed by our manufacturers that products contain more than 0.1 mass percent of SVHC substances, we will fulfil our duty to provide information in accordance with Art. 33 of the REACH Regulation by means of separate letters and, if necessary, offer substitute products via our members.

**RoHS**

According to this directive, there are no corresponding information obligations. Instead, affected items must be marked with the designated CE marking. This marking confirms compliance with the directive.

As part of its contractual relationships with its suppliers, the E/D/E uses an annex for the supplier's declaration of conformity with regard to the RoHS Directive.

Yours sincerely
