Dear Customer

In response to your request we would like to inform you that our SMALL 1/4' 304/FPM VALVE (900102) does NOT contain PFAS, as declared by the seal manufacturer.

AISI 304 stainless steel is PFAS free.

This does not exclude that some of these substances may possibly be present as trace, impurities or as unintentional contaminant but we do not specifically run any analysis on raw materials or end products to determinate their presence.

Kind regards

Mondeo srl
