RE: Simpson Strong-Tie® Steel Fasteners and Mechanical Anchors  
1907/2006 on the Registration Evaluation Authorization and Restriction of Chemicals (REACH)

Under the definition of the REACH regulations EC1907/2006, Simpson Strong-Tie is a producer of “articles”. REACH requires article suppliers to inform recipients if an article contains a Substance of Very High Concern (SVHC) in excess of 0.1% by weight.

Simpson Strong-Tie has thoroughly evaluated all of our raw materials, process materials and products. To the best of our knowledge, Simpson Strong-Tie Steel Fasteners and Mechanical Anchor products do not contain any substances included on the REACH 235 SVHC list in a concentration in excess of the specified threshold limits. It should be noted that Stainless Steels (304/305/316) has Nickel contents (Ni), which is number 27 in REACH Annex XVII. However, under normal or reasonably foreseeable conditions, Nickel in screws is not designed to be released, and is not subject to the dermal contact limitation of the REACH directive. Therefore, these products are in compliance with the latest 235 substances as updated by ECHA on June 14, 2023.

Additional information on the European Union's REACH regulation can be found on their website: <https://echa.europa.eu/regulations/reach/understanding-reach>. For the most current candidate list of substances, please refer to <http://echa.europa.eu/candidate-list-table>

Simpson Strong-Tie offers a wide variety of connectors, anchors and fastener products. For more information on our products, installation instructions, allowable loads, product Safety Data Sheet and other related information please refer to current product literature at [www.StrongTie.com](http://www.StrongTie.com).

Regards,

  
Tracy Stanfill  
Program Manager, Trade Compliance
