Virgin Pulp

Recycled fibres

Chemicals

Material

In the tissue process both virgin fibres and recovered paper are being used. In the process it is a matter of finding an efficient solution where both virgin fibres and recovered paper play a role. Different fibres demand different processes and this determines the end product properties, and makes the fibre type (recovered or virgin) less important.

The environmental benefits and economic feasibility of recovered paper as a raw material source depend on its availability, transport distance and the quality of the collected material.

Bleaching of fibres

Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety. There are different methods used today for bleaching ECF (elementary chlorine free) where chlorine dioxide is used, and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.

Chemicals

The chemicals used in the process as well as the functional chemicals are assessed from an environmental, occupational health and safety and product safety point of view .

The used functional chemicals are:

Wetstrength agent

Dry strength agent

Dye = if coloured

Fixing agents

Glue = if used

The process chemicals are:

Antipitch

Protection agent

Yankee coating

Defoamer

Dispersing agents and surfactants

pH and charge control

Retention aids

Broke treatment chemicals

Drainage aid

Tork Reflex Aftørringspapir Plus, M4

Farve: Hvid Type: Centerfeed Rulle

Packaging

Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes

Food contact

This product fulfils the legislative requirements for Food Contact materials, confirmed by external certification performed by a third party. The product is safe for wiping food contact surfaces and may also come occasionally into contact with foodstuffs for a short period of time.

Environmental label = EU Ecolabel

This product is approved for the EU Ecolabel.

Date of issue : 2011

Revision date 2014-05-26

Production

Material produced and converted at Hondouville mill, France, certified according to ISO 9001 : 2008 & ISO 14001 : 2004

Destruction

CENTREFEED is used both for personal hygiene and for industrial processes. When used in industrial processes the product might through use be contaminated with different substances. This will determine how the used product will be handled / disposed of /destructured. The product itself is suitable for incineration. If used in industrial processes contact local authorities before destruction.
