OUR REF.:

TESERO, 02.09.2024

SUBJECT: **REACH DECLARATION**

We hereby refer to the *Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006* concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH).

Article 33 of such Regulation states that "Any supplier of an article containing a substance meeting the criteria in Article 57 and identified in accordance with Article 59(1) in a concentration above 0,1 % weight by weight (w/w) shall provide the recipient of the article with sufficient information, available to the supplier, to allow safe use of the article including, as a minimum, the name of that substance."

In this regard, it has to be considered that certain components made of brass (pins/terminals, threaded inserts, cutters) integrated on electrofusion fittings and electrofusion transition fittings manufactured by EUROSTANDARD S.p.A. contain lead in concentration up to 3,5 % w/w.

Lead (EC No. 231-100-4, CAS No. 7439-92-1) has been included by ECHA (European Chemicals Agency) in the *Candidate List of substances of very high concern for authorisation* through Decision Doc. ED/61/2018, which took effect from 27 June 2018.

Nevertheless, based on our knowledge, as long as fittings are used accordingly to instructions given by reference standards and Eurostandard technical manuals, no risk arises for users from the presence of lead.

At the moment, no other substance included in the *Candidate List of substances of very high concern for authorisation* nor in Annex XIV *List of substances subject to authorisation* of Regulation (EC) No. 1907/2006 are contained in fittings manufactured by EUROSTANDARD S.p.A. in a concentration above 0,1 % w/w.

EUROSTANDARD S.p.A.
