Declaration of Compliance

Food Contact Material (FCM) sealing parts in rubber

We certify that all rubber sealing parts (FPM, FKM, VMQ (SIL), EPDM, HNBR, NBR) included in our Dairy fittings are compliant with the relevant regulations:

- Regulation (EC) No 1935/2004 – Materials and Articles intended to come into contact with food
 - Until there are specific measures outlined for rubber materials in the EU legislation, the FDA CFR21 / §177.2600 standard is followed to comply with article 3 in EU1935/2004
- Regulation (EC) No 2023/2006 – Good Manufacturing Practice
- FDA CFR21 / §177.2600 - Rubber parts intended for repeated use
- Bekendtgørelse Nr. 681 af 25/05/2020 - Danish regulation that concerns food contact materials
- Regulation (EU) 2024/3190 – Use of bisphenol A (BPA) and other bisphenols

It is important to note that as per FDA CFR21 / §177.2600(g), rubber articles intended for contact with food must be thoroughly cleaned prior to food contact.

It remains the customer's own responsibility to check if the rubber sealing parts are suitable for your specific application, considering the contact time, contact temperature, and type of food.
