

# Specifications

## Eaton 266677

Eaton Moeller series NZM - Molded Case Circuit Breaker. Cover, 4p, size 2

### General specifications

|                             |                                          |
|-----------------------------|------------------------------------------|
| <b>PRODUCT NAME</b>         | Eaton Moeller series NZM remote operator |
| <b>CATALOG NUMBER</b>       | 266677                                   |
| <b>MODEL CODE</b>           | NZM2-XAVPR                               |
| <b>EAN</b>                  | 4015082666774                            |
| <b>PRODUCT LENGTH/DEPTH</b> | 114 mm                                   |
| <b>PRODUCT HEIGHT</b>       | 8 mm                                     |
| <b>PRODUCT WIDTH</b>        | 40 mm                                    |
| <b>PRODUCT WEIGHT</b>       | 0.018 kg                                 |
| <b>COMPLIANCES</b>          | IEC<br>RoHS conform                      |

### Additional information

|                             |       |
|-----------------------------|-------|
| <b>PHASE SEPARATOR TYPE</b> | Other |
|-----------------------------|-------|

### Delivery programme

|                        |                 |
|------------------------|-----------------|
| <b>FRAME</b>           | NZM2            |
| <b>NUMBER OF POLES</b> | Four-pole       |
| <b>TYPE</b>            | Remote operator |
| <b>USED WITH</b>       | NZM2-4<br>N2-4  |

## Design verification to IEC/EN 61439

|                                                                                         |                                                                                                                                  |
|-----------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| <b>10.10 TEMPERATURE RISE</b>                                                           | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| <b>10.11 SHORT-CIRCUIT RATING</b>                                                       | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| <b>10.12 ELECTROMAGNETIC COMPATIBILITY</b>                                              | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| <b>10.13 MECHANICAL FUNCTION</b>                                                        | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |
| <b>10.2.2 CORROSION RESISTANCE</b>                                                      | Meets the product standard's requirements.                                                                                       |
| <b>10.2.3.1 VERIFICATION OF THERMAL STABILITY OF ENCLOSURES</b>                         | Meets the product standard's requirements.                                                                                       |
| <b>10.2.3.2 VERIFICATION OF RESISTANCE OF INSULATING MATERIALS TO NORMAL HEAT</b>       | Meets the product standard's requirements.                                                                                       |
| <b>10.2.3.3 RESIST. OF INSUL. MAT. TO ABNORMAL HEAT/FIRE BY INTERNAL ELECT. EFFECTS</b> | Meets the product standard's requirements.                                                                                       |
| <b>10.2.4 RESISTANCE TO ULTRA-VIOLET (UV) RADIATION</b>                                 | Meets the product standard's requirements.                                                                                       |
| <b>10.2.5 LIFTING</b>                                                                   | Does not apply, since the entire switchgear needs to be evaluated.                                                               |
| <b>10.2.6 MECHANICAL IMPACT</b>                                                         | Does not apply, since the entire switchgear needs to be evaluated.                                                               |
| <b>10.2.7 INSCRIPTIONS</b>                                                              | Meets the product standard's requirements.                                                                                       |
| <b>10.3 DEGREE OF PROTECTION OF ASSEMBLIES</b>                                          | Does not apply, since the entire switchgear needs to be evaluated.                                                               |
| <b>10.4 CLEARANCES AND CREEPAGE DISTANCES</b>                                           | Meets the product standard's requirements.                                                                                       |
| <b>10.5 PROTECTION</b>                                                                  | Does not apply, since the                                                                                                        |
