

Statement of Memory Volatility

Product and Manufacturer				
Models: 2052R/2062R/2000T		Manufacturer: Fluke Corporation		
		Address: 6920 Seaway Blvd.		
		City: Everett	State: WA	Zip: 98203
Volatile Memory				
Does the item contain volatile memory (i.e., memory whose contents are lost when power is removed)? ☐ Yes ☒ No (If the answer is 'Yes', provide the following information for each type of memory.)				
Memory Type (SRAM, DRAM, etc.):	Size:	User Modifiable:	Function:	Process to Clear:
		☐ Yes ☐ No		
Non-Volatile Memory				
Does the item contain non-volatile memory (i.e., memory whose contents are retained when power is removed)? ☐ Yes ☒ No (If the answer is 'Yes', provide the following information for each type of memory.)				
Memory Type (BBRAM, Flash, EEPROM, etc.):	Size:	User Modifiable:	Function:	Process to Clear:
		☐ Yes ☐ No		

Media

Does the item contain media storage capability (i.e., removable or non-removable disk drives, memory cards, etc.)?

☐ Yes ☒ No

(If the answer is 'Yes', provide the following information for each type of memory.)

	Storage Type (Disk, Tape, etc.):	Size:	User Modifiable:	Function:	Process to Clear:
			☐ Yes ☐ No		

Additional Information

<Example: This is a simple cable tester. FLASH memory is used for program storage and is modified in one instance to store a simple 16-bit number which is used as a calibration factor (called the Nominal Velocity of Propagation). This factor is used to correct the length measurement of a cable. RAM memory is used as operating memory and stack while the unit is running.>
