

drylin® R carbon fibre shaft | CWM

CWM-12

drylin® R carbon fibre shaft | CWM

- Extremely low weight
- High flexural strength

Product description

Introducing the drylin R carbon fibre shaft, CWM, a remarkable addition to the drylin product family. Crafted from high-quality carbon fibre, this shaft boasts an extremely low weight, making it ideal for various applications. Its high flexural strength ensures durability and reliability. Experience the perfect blend of performance and lightweight design with the drylin R carbon fibre shaft, CWM, and elevate your projects to new heights.

Manufacturing and installation tolerances

d tolerance	-0,1 mm
-------------	---------

Dimensions

Design	Hollow shaft
Outer diameter d	12 mm
Inner diameter di	9 mm
max. length	2000 mm

General properties

Material	CFK Composite
Surface roughness Ra	< 0,6 µm

Certificates and standards
