- Individual colours available upon request

Product description

Protect your rotating shafts with the igubal EC end caps, designed for two-hole and four-hole fixed flange bearings. Made from flexible material, they ensure no damage while preventing access to the bearing area, enhancing safety. These end caps are easy to assemble and disassemble, making maintenance a breeze. Available in standard orange, they can also be customised in various colours and with your company logo. Choose igubal for reliable protection and personalised options.
