

Stainless steel spherical ball

EK-05

Stainless steel spherical ball

- Material: stainless steel
- Dimension series E and K based on DIN ISO 12240
- Very good wear resistance
- Very good temperature resistance
- Suitable for high pressure loads
- Suitable for applications in the food, packaging, pharmaceutical and automotive industries

B	6 mm
Ø dk	10.3 mm
Part number	EK-05

Product description

Introducing the Stainless Steel Spherical Ball, a versatile solution designed for various industries including food, packaging, pharmaceuticals, and automotive. Crafted from durable stainless steel, it offers excellent wear and temperature resistance, making it ideal for high-pressure applications. With its reliable performance, this spherical cap is a perfect choice for those seeking quality and longevity in their projects. Choose the Stainless Steel Spherical Ball for unmatched durability and efficiency.

Requirements

Mould-resistant according to DIN EN ISO 846 Procedure A	No
---	----

General properties

Dimensional series	E, according to DIN ISO 12240
Spherical ball material	Stainless steel

Thermal properties

Max. long-term application temperature	850 °C
Lower application temperature	-200 °C

Dimensions

Shaft diameter	5 mm
Ø dk	10.3 mm
B	6 mm
