

Split pillow block bearing for shafts, ESRM, igubal®

ESRM-120

Split pillow block bearing for shafts, ESRM, igubal®

- Split version of housing and spherical ball
- Easy assembly and disassembly
- High loads
- Lightweight
- Compensation for misalignments

Product description

Introducing the ESRM Split Pillow Block Bearing for Shafts by igubal®. This innovative bearing features a split design for easy assembly and disassembly, making it perfect for high-load applications. Its lightweight construction offers exceptional performance while compensating for misalignments. Enjoy a maintenance-free experience with a long service life and environmentally friendly design, eliminating the need for additional lubricants. Enhance your machinery's efficiency with this reliable solution from igubal®.
