

iglidur® IC-04, coating powder

IC-04-20KG

iglidur® IC-04, coating powder

- Extreme wear resistance
- Resistance to chemicals
- Highly temperature resistant (-100 °C to 300°C)
- Eliminates the need for additional lubrication with incorporated solid lubricants

Product description

Introducing the iglidur® IC-04 coating powder, a tribologically optimized polymer designed to enhance metallic surfaces through powder coating. This exceptional coating offers extreme wear resistance and chemical resilience, protecting heavily used surfaces without the need for additional lubrication. Ideal for applications in the packaging industry and laboratory equipment, it withstands temperatures from -100°C to 300°C. Elevate your surface protection with iglidur® IC-04 for lasting performance.
