

## iglidur® IC-05, coating powder

### IC-05-20KG

### iglidur® IC-05, coating powder

- Lasts up to 4 times longer than IC-01 in linear short stroke
- Food compatible according to FDA and EU10/2011
- Eliminates the need for additional lubrication with incorporated solid lubricants
- Increases the service life of your application
- 480 h Salt spray test according to DIN EN ISO 9227

### Product description

Introducing iglidur® IC-05 coating powder, a tribologically optimized polymer designed to enhance metallic surfaces. This innovative powder coating offers exceptional friction and wear resistance, extending the life of heavily used surfaces without extra components. Suitable for the packaging and drink filling industries, it is food compatible according to FDA and EU standards. With impressive corrosion protection tested for 480 hours, iglidur® IC-05 ensures durability and reliability for your applications.
