

## iglidur® PRT universal sliding elements, iglidur® J JRS-500-Z

### iglidur® PRT universal sliding elements, iglidur® J

- Universally applicable for large slewing rings
- Suitable for a diameter of 500 to 2,000mm
- Cost-effective and ready to install
- Tested in the igus® laboratory and material combination in use in many customer applications
- Lubrication and maintenance-free

### Product description

Introducing the iglidur® PRT universal sliding elements, iglidur® J, designed for versatility and performance. These sliding elements excel in reducing friction and wear, even under high loads. Their innovative Z design allows for custom installation sizes, while adjustable height and diameter make them adaptable to various applications. Maintenance-free and lubrication-free, they are perfect for dry operation. Ideal for large slewing rings, they are cost-effective and tested for reliability in numerous applications.
