

Signal connector SUB-D, angular connector, incl. contacts

MAT01716508

Product description

Introducing the SUB-D signal plug-in connector, an angular connector designed for durability and reliability. Crafted from nickel-plated zinc die casting, it features a robust glass-fibre-reinforced polyester insulation insert and flash gold-plated copper alloy contacts. This connector is built to withstand temperatures from -35 °C to +100 °C, ensuring excellent performance in various environments. Ideal for your connectivity needs, it combines quality materials with a practical design.

Thermal properties

Temperature range	-35°C up to +100°C
-------------------	--------------------

Electricity attributes

Max. continuous nominal current	5A
Test voltage	(L-L) 1,200V
Transitional resistance	10 ¹⁶ Ω/cm
Insertion cycles	2

General properties

Design	Angular connector
Solder insert	Pin, standard 9 pin
Material	Zinc die casting nickel plated
Insulation body	Fibreglass reinforced polyester
Contacts	Copper alloy, flash gold-plated
