

Signal plug-in connector SUB-D straight, incl. contacts

MAT01716520

Product description

Introducing the Signal Plug-in Connector SUB-D Straight, a reliable choice for your connectivity needs. This connector is designed for seamless integration, ensuring stable signal transmission. Its straight configuration makes it easy to use in various applications. Trust this durable and efficient connector to enhance your setup and keep your connections secure. Perfect for both professional and personal projects.

Thermal properties

Temperature range	-35°C up to +100°C
-------------------	--------------------

Electricity attributes

Max. continuous nominal current	5A
Test voltage	(L-L) 1,200V
Transitional resistance	10 ¹⁶ Ω/cm
Insertion cycles	2

General properties

Design	Standard connector
Solder insert	Pin, standard 25 pin
Material	Zinc die casting nickel plated
Insulation body	Fibreglass reinforced polyester
Contacts	Copper alloy, flash gold-plated
