

Speedtec connector series 917, M17 power connector, incl. contacts

MAT01723495

Product description

Introducing the Speedtec connector series 917, M17 power connector. Crafted from durable zinc die-casting and brass with a nickel-plated finish, this connector ensures robust performance. It features a pollution degree of 3 and offers superior protection with an IP 66/67 rating when plugged. Designed to withstand temperatures from -20 °C to +130 °C, it's perfect for demanding environments. The gold-plated contacts and FPM seal guarantee reliability, making it an ideal choice for your power connection needs.

Dimensions

Clamping range	9.5-12.0mm
----------------	------------

Electricity attributes

Max. continuous nominal current	20A
Nominal voltage (AC/DC)	630V
Transitional resistance	< 5mΩ
Insertion cycles	> 50
Degree of pollution	2
Overvoltage category	III

General properties

Insulator & number of poles	P-Type 4-pole
Number of poles	4 pin
Max. installation height	2000 mm
Connector design	Power connector
