

igubal® 2-hole flange bearing with bearing insert,
sheet metal housing

PFL202-J4EM-15-12-SP

igubal® 2-hole flange bearing with bearing
insert, sheet metal housing

- PFL204 to PFL206
- Lubrication and maintenance free
- Insensitive to dirt

Product description

Introducing the igubal® 2-hole flange bearing with bearing insert, designed for seamless integration into sheet metal housings. Made from high-performance iglidur plastic, these maintenance-free bearing inserts eliminate the need for lubrication, making them perfect for dirty environments. Easy to mount by hand, they offer a quick solution without costly conversions. Experience durability and wear resistance with the igubal® flange bearing, available in sizes P204-208. Enjoy hassle-free operation and reliability in your applications.

Manufacturing and installation tolerances

Installation tolerance d1	E10
Recommended shaft tolerance	h9
Recommended shaft roughness	01_03_mikrometer

General properties

Spherical ball material	igidur® J4
Weight	84.364 g

Dimensions

Shaft diameter	15 mm
L	59 m
m	63.5 mm
A1	4 mm
Ag	14 m
h	81 mm
