

iglidur® slewing ring, PRT-04 with angle limiter over 360°, outer ring made of aluminum, sliding elements made of iglidur® J

PRT-04-20-TS-360

iglidur® slewing ring, PRT-04 with angle limiter over 360°, outer ring made of aluminum, sliding elements made of iglidur® J

- Stops can be adjusted quickly and individually: prevents rotation of the PRT slewing ring bearing
- 20% cheaper compared to the PRT-01
- 60% lighter, 50% more space saving compared to the PRT-01
- Easy to replace and expand: modular design

Product description

Introducing the iglidur® slewing ring PRT-04, designed for maximum versatility with an adjustable angle limiter over 360°. Crafted with a lightweight aluminum outer ring and durable iglidur® J sliding elements, this slewing ring is 60% lighter and 50% more space-efficient than its predecessor. Enjoy quick and individual stop adjustments to prevent unwanted rotation. Its modular design makes it easy to replace and expand, offering a smart solution for your needs.
