Product description

Introducing the iglidur® PRT manual clamping, a key component of the PRT-04 series modular system by igus. This innovative slewing ring bearing features a lightweight, hard anodised aluminium design, allowing for lubrication-free, dry operation. The manual clamping mechanism enables quick and easy attachment anywhere on the outer ring, providing a holding torque of up to 10Nm with just 1Nm of screw torque. Perfect for versatile applications, it's a reliable choice for your machinery needs.
