

drylin® Q linear plain bearing with angular flange, tandem

QJFMT-02-10

drylin® Q linear plain bearing with angular flange, tandem

- Enclosed anodised aluminium housing
- Maximum moments up to 3 Nm (size 10) and up to 10 Nm (size 20)
- Torque-resistant sliding elements made from iglidur® J

Product description

Discover the drylin Q linear plain bearing with angular flange, tandem, designed for durability and performance. Its enclosed anodised aluminium housing ensures protection, while the torque-resistant sliding elements made from iglidur J offer exceptional reliability. With maximum moments of up to 3 Nm for size 10 and 10 Nm for size 20, this bearing is perfect for a variety of applications. Experience smooth operation and long-lasting quality with drylin Q.

Manufacturing and installation tolerances

d2 tolerance	h7
d3 tolerance	±0,15 mm

Dimensions

Qa	7.5 mm
Ø d2	19 mm
k	30 mm
Bf	9 mm
Ø d3	39 mm
B	52 mm
Ø dB	4.5 mm
Ø ds	7.5 mm
ts	4.1 mm
B	52 mm

General properties

Sliding element material	igidur® J
