drylin® R linear slide bearing RJ200UM-01

- Secured by circlips
- Enclosed anodised aluminium adapter
- Liner material: iglidur® J200

Product description

The drylin R linear slide bearing RJ200UM-01 features a durable iglidur J200 sliding element and an enclosed anodised aluminium adapter. Its long, closed design is secured by circlips, offering a robust and reliable solution. Combining functionality with a sleek look, this bearing is perfect for various applications where quality and performance matter.
