

Initiator kit for drygear® RL-D worm gearbox

RL-D-20-IK-001-BB

Initiator kit for drygear® RL-D worm gearbox

- Initiator kit for drygear® RL-D worm gear units
- Suitable for the ball bearing version (ball bearing rotary tables / slewing rings)

Product description

Introducing the Initiator Kit for drygear® RL-D Worm Gearbox, designed for precision and reliability. This essential kit includes a normally open contact initiator, perfect for limiting the travel angle of gears and ensuring accurate reference runs with incremental encoders. Ideal for use with ball bearing versions, such as rotary tables and slewing rings, this kit enhances your system's performance and functionality. Upgrade your gear units with this indispensable accessory.
