

iglidur® A500, plate strips

SFPA500-06-160

iglidur® A500, plate strips

- Compliant with EU regulation 10/2011 EC, FDA-compliant
- Temperature-resistant from -100°C to +250°C
- High chemical resistance
- Good wear resistance under water
- Resistant to edge pressure
- Resistant to shocks and impacts

Product description

Introducing the iglidur® A500 plate strips, designed for versatility and durability. These strips are compliant with EU regulation 10/2011 EC and FDA standards, ensuring safety for various applications. They withstand extreme temperatures from -100°C to +250°C and boast high chemical resistance. Ideal for demanding environments, they offer excellent wear resistance in water and are resilient against edge pressure, shocks, and impacts. Perfect for your toughest projects!
