

REC200 bar stock plates

SFPREC200-04-1000-1000

REC200 bar stock plates

- high hardness and rigidity
- high toughness (down to -40 °C)
- high heat resistance
- low water absorption
- high dimensional stability
- good electrical insulating behaviour
- good sliding properties
- high resistance to solvents

Product description

Discover the REC200 bar stock plates, made from high-quality POM in black. These semi-finished products offer high hardness, rigidity, and toughness even at -40°C. With excellent wear resistance, low water absorption, and good chemical resistance, they are ideal for mechanical, electrical, and automotive uses. Durable and cost-effective, they deliver reliable performance in demanding applications.
