

iglidur® A250,bar stock round bar

SFRA250-3000

iglidur® A250,bar stock round bar

- Complies with food and drug administration (FDA) regulations for repeated contact with food
- Good media resistance
- For wet environments
- High wear resistance

Product description

Introducing the iglidur® A250 round bar, a versatile lubrication-free solution perfect for creating maintenance-free sliding elements and bearings. This FDA-compliant bar stock ensures safety for repeated food contact, making it ideal for medical technology and plant construction. With excellent wear resistance and adaptability for wet environments, it meets high compressive strength and flexibility needs. Available for custom shapes and urgent prototypes, the iglidur® A250 is your go-to choice for specialized applications.
