

drylin® laser sintering lead screw support with
iglidur® plain bearings, fixed bearings, left-hand
thread

SLS-10X3-FL-LH

Product description

Introducing the drylin laser sintering lead screw support from igus, designed for durability and efficiency. This corrosion-free support features lubrication-free iglidur plain bearings and is available with fixed or floating bearing options. Crafted from hard anodised aluminium, it ensures reliability and easy installation with pre-drilled mounting holes. Suitable for thread sizes 6-24mm, it accommodates left-hand threads for versatile applications. Experience maintenance-free performance with this innovative solution for your lead screw needs.

Physical properties

Max. axial static pressure load	700 N
---------------------------------	-------

Requirements

Mould-resistant according to DIN EN ISO 846 Procedure A	No
---	----

General properties

Weight	92.9794 g
--------	-----------

Dimensions

Thread size	TR10X3
Ø d1	10 mm
E1	36 mm
H Bolt	32 mm
A	50 mm
lt	30 mm
tk	11 mm
ha	16 mm
