Product description

Discover the igubal® plastic adjusting rings, split, designed for versatile mounting in tight spaces. These lightweight collars feature a stainless steel bolt and nut for secure attachment to cables or shafts. Their innovative design allows for easy clamping adjustments, making them perfect for maintenance-free use in corrosive environments. With a cost-effective solution that meets DIN 705 standards, these set collars are an ideal choice for your next project. Experience reliability and ease with igubal®.
