

drylin® R steel shaft, case-hardened, SWI, imperial
SWI-04

drylin® R steel shaft, case-hardened, SWI, imperial

- Hardened 1060 Steel
- Class L Tolerance

Product description

Introducing the drylin R steel shaft, a reliable choice for your projects. Made from hardened 1060 steel, this shaft offers exceptional durability and strength. With its Class L tolerance, you can trust in its precision for your applications. Ideal for various uses, the drylin R steel shaft ensures long-lasting performance and quality. Choose this case-hardened solution for your next engineering challenge.

Dimensions

Design	solid shaft
Outer diameter d	0.2495 in
max. length	8 in

General properties

Material	Hardened 1060 Steel
----------	---------------------
